TeamBoard 8060

## The world's LARGEST Interactive Presentation Touchscreen!

Simply Huge

Larger Audience? Larger Screen.

Designed to accommodate larger audiences, the TeamBoard 8060 measures an incredible 80"w x 60"h (100" diagonal), providing a full-screen display while maintaining the 4:3 aspect ratio.

These dimensions are achieved by linking two single-frame TeamBoards on an EganSystem track. A slim, matching color, center moulding offers a clean finish to the framing, creating a single-board effect. This design ensures simple installation and easy repositioning. The TeamBoard 8060 provides a precisely calibrated display that is almost 60% larger (proportionately) than 60"w x 48"h boards.

Two controllers are utilized to achieve exact calibration; the connected computer requires either two USB or two serial ports. Egan PowerX and TeamBoard Suite have been customized especially for the TeamBoard 8060. The Egan PowerX and TeamBoard Suite ActionBars have also been modified for easy access to frequently-used buttons at either end of the board.

TeamBoard 8060
